

MDQ03

A versatile component trolley that can be used both as a work surface and for storing tools and components.

- The sturdy metal construction ensures product stability, while the solid-rubber castors allow for smooth movement within the working environment.
- The shelves of the component trolley have high edges to prevent small parts from rolling off.
- Perforated panels can be added to the sides of the trolley for additional tool storage.
- The maximum load capacity is up to 150 kg when the load is evenly distributed.

The product is delivered unassembled as separate components. Assembly is available for an additional charge.
