

MDQ04

A shelving unit with ample storage space, designed to meet the needs of production environments.

- The sturdy metal frame ensures the stability of the shelving unit. The maximum load capacity depends on the selected castors and shelf material. Reinforcement brackets are available for added rigidity and are particularly recommended for the mobile version with castors.
- The standard shelf material is plywood. The frame can also be ordered separately without shelf panels
- Solid-rubber castors can be added to the shelving unit, allowing for smooth and easy movement within the working environment.

The product is delivered unassembled as separate components. Assembly is available for an additional charge.

Dimension options (mm)

W: 400; 615; 815; 1000
L: 1000; 1235; 1835; 2500
H: 1940
R: Depend on wheel model (100-200mm)
