

MDQ05

The workbench combines the best features of our tool trolley and workbench.

- The upper and lower work surfaces are supported by a stable metal frame, with perforated panels available along the upper section for additional tool storage.
- In addition to the two existing shelves, a third shelf can be added for extra storage. Like all our products, the workbench's metal structure is powder-coated to ensure a durable finish. The workbench is fitted with swivel solid-rubber castors for smooth and easy movement.
- The standard worktop material is plywood. The frame can also be ordered separately without the worktop panels.
- The maximum load capacity, with the load evenly distributed, is up to 200 kg for the version with castors and up to 350 kg for the version with legs.

The product is delivered unassembled as separate components. Assembly is available for an additional charge.

Dimension options (mm)
