

MDQ06

A cantilever shelving unit with ample storage space, designed to meet the needs of production environments.

- The sturdy metal frame ensures the stability of the shelving unit. The maximum load capacity depends on the selected castors.
- The cantilever beams are made of moisture-resistant plywood, but we also offer various beam types to suit different needs and specific requirements. The frame can also be ordered separately without the beam panels..
- Solid-rubber castors can be added to the shelving unit, allowing for smooth and easy movement within the working environment..

The product is delivered unassembled as separate components. Assembly is available for an additional charge.

Dimension options (mm)

H: 1280; 1980
L: 1250
W1: 600 (can be ordered custom length)
W2: 600; 1200 (can be ordered custom length and shape)
R: Depend on wheel model (100-200mm)
