

MDQ07

A table with a sturdy metal frame and a large work surface, designed to meet the needs of production environments.

- The standard worktop material options are plywood and high-pressure laminate (HPL) faced wood-based board.
- Additional shelves can be added beneath the worktop to provide extra storage space. Bolted connections and perforated posts allow additional shelves to be mounted on the sides of the table for tool storage.
- The frame can also be ordered separately without the worktop panels.

The product is delivered unassembled as separate components. Assembly is available for an additional charge.
